

## SAFESPOT INTEGRATED PROJECT - IST-4-026963-IP

# User Needs and Requirements for Positioning, Local Dynamic Maps and Vehicle Ad Hoc Networks

SubProject No.	SP3	SubProject Title	SINTECH
Workpackage No.	WP2	Workpackage Title	Need and Requirements
Task No.	3.2.2-4	Task Title	Need and Requirements
Authors (per company, if more than one company provide it together)	Michele Provera, Graziella Carobene, CRF Christine Bartels, TA Florian Ahlers, IBEO Zoltan Papp, TNO Christian Zott, Bosch Tobias Schendzielorz, TUM Robin Schubert, Heiko Cramer, TUC		
Status (F: final; D: draft; RD: revised draft):	RD		
Version No:	1.0		
File Name:	D3.2.2 User Needs and Requirements 0.5.doc		
Issue Date:	12/20/2006		
Project start date and duration	01 February 2006, 48 Months		

## EXECUTIVE SUMMARY

The objective of WP2 is to define user needs and requirements valid for all the SAFESPOT subprojects.

To define the SAFESPOT requirements has been defined a common “activity flow” to be adopted to SP1 SP2 SP3 SP4 SP5 and SP7. The activity flow describes the information or functions that are to be shared among the different SPs, highlighting the Producer and the Consumer of that information.

The definition of User Needs and Requirements for the three Technical Tasks of SINTECH (Vehicular Ad hoc networks, Positioning and Local Dynamic Maps) follows the guidelines identified by SP7 SCORE.
